## **FILM ALERT**

### ***Heart of the Grizzly Bear Nation: Past, Present and Future*** **David Mattson, PhD.**

Jan. 8 at 7:00 p.m. MT on Montana TV Network (MTN)  
Jan. 12 at 5:30 p.m. MT on Montana TV Network (MTN)  
Jan. 28 at 10:30 p.m. MT on Montana TV Network (MTN)

In this 75 minute talk, presented on December 6, 2018, noted bear biologist Dr. David Mattson discusses the past, present and future of grizzly bears in the Northern Continental Divide Ecosystem.

Dr. Mattson offers a different perspective than you will hear from any government spokesperson. He calls this region the "Heart of the Grizzly Bear Nation" because the vigor of this bear population will dictate future prospects for all grizzlies in the northern US Rocky Mountains and adjacent Canada.

Links will be provided shortly. This talk will also be posted on our YouTube site.
