

GRIZZLY TIMES BLOG

The following blog is posted on Grizzly Times at www.grizzlytimes.org, where important context and perspectives on grizzly bear management and the prospective removal of grizzly bears from Endangered Species Act protections is provided.

Louisa Willcox has worked for more than 30 years for various conservation organizations on behalf of grizzly bears and their wild ecosystems (<http://www.grizzlytimes.org/#!/who-we-are/c1mzo>).

Her husband Dr. David Mattson, a renowned grizzly bear scientist and former researcher with the Interagency Grizzly Bear Study Team, has contributed considerable scientific information to this site providing more substantive background on this complex topic than you will find anywhere else.

We believe that, armed with accurate information, the public can more effectively engage in this critical debate about an iconic animal in and around our nation's oldest park.

Don't Delist, Risk Yellowstone Grizzly Bears' Future

March 10, 2016
